CAMPBELL SCIENTIFIC DATA LOGGER PROGRAMMING SERVICE

RESEARCH—SIMPLIFIED

Using a Campbell Scientific data logger but don't have time for complex programming? Let METER experts do the work for you.

FREE STANDARD PROGRAMS

If all you need to do with your Campbell Scientific data logger is log data, we have a list of standard programs that may help. We've also worked extensively with Campbell Scientific to implement our sensors into Campbell's "shortcut" programs, which allow you to quickly and easily build simple programs for reading our sensors with their loggers.

COMPLEX APPLICATIONS

If you have a more complex application, it may be beyond the scope of what our customer service staff can provide. Campbell Scientific offers courses in programming and also has a program-writing service. Check out their offerings at www.campbellsci.com/training.

SOIL MOISTURE SENSOR-FRIENDLY PROGRAMS

In some cases, the Campbell Scientific programmers lack experience working with dielectric soil moisture sensors. If Campbell Scientific is unable to offer programming support, contact us.
