

SKALA AQNIR SPECIFICATION SHEET

18328-01
1.31.2020

METER

Description

The SKALA[®] AQNIR is an inline near-infrared (NIR) spectrometer that has been designed from the ground up for use in monitoring in-process moisture and water activity, even in the most extreme production environments. Using SKALA, multiple product calibration models can be maintained and updated seamlessly and in real time. Calibration maintenance is made simple and intuitive by integrating the process into the SKALA work flow.

Specifications

Wavelength Range	850–1750 nm	Enclosure Material	316 stainless steel
Wavelength Resolution	6 nm	Window Material	High-strength borosilicate glass
Minimum Acquisition Time	1 ms	Light Source	Tungsten-Halogen (3,000-h life)
Maximum Acquisition Time	1 s	Target Distance	<1–10 in (<2.54–25.4 cm)
Operating Temperature	0–50 °C	Communication	Standard TCP/IP PLC
Temperature Control	Integrated Enclosure TEC System	Display	7-in (17.78-cm) touch display
Intrusion Rating	IP67	Power	100–240 VAC, 50–60 Hz
