Re: Sole Source Certificate for ATMOS 14 Microclimate sensor

To Whom It May Concern:

This is to certify that METER Group, Inc., a company based in Pullman, WA, is the sole manufacturer of the ATMOS 14 Microclimate Station.

The ATMOS 14 was designed for continuous monitoring of the following environmental variables: Air temperature, relative humidity, barometric pressure, and vapor pressure. All sensors are integrated into a single, small form-factor unit, requiring minimal installation effort. The robust design with no moving parts prevents errors due to wear and makes the sensor ideal for long-term, remote installations. This sensor is compatible with ZENTRA or EM60 data loggers, or able to be integrated with compatible third-party data loggers.

Each sensor output is verified at our facility before it is shipped. The ATMOS 14 is manufactured at METER Group's facility in Pullman, Washington, and sold directly to end users, as well as to domestic irrigation management representatives and international distributors. The product has a one-year warranty that covers all necessary maintenance or repair, an attempt at sensor maintenance outside of METER will void this warranty.

Any comments or questions regarding this document can be brought to my attention.

Sincerely,

Jeff Ritter
