Re: Sole Source Certificate for ATMOS 22 Sonic Anemometer

To Whom It May Concern:

This is to certify that METER Group, Inc., a company based in Pullman, WA, is the sole manufacturer of the ATMOS 22 Anemometer.

The ATMOS 22 was designed for continuous monitoring of the following environmental variables: Horizontal wind speed, wind gust, wind direction, and tilt. All sensors are integrated into a single, small form-factor unit, requiring minimal installation effort. The robust design with no moving parts prevents errors due to wear and makes the sensor ideal for long-term, remote installations. This sensor is compatible with ZENTRA or EM60 data loggers, or able to be integrated with compatible third-party data loggers.

Each sensor output is verified at our facility before it is shipped. The ATMOS 22 is made in the factory here in Pullman, WA and sold directly to the end-user (as well as to domestic irrigation management representatives and international distributors). The product has a one-year warranty that covers all necessary maintenance or repair, an attempt at sensor maintenance outside of METER will void this warranty.

Any comments or questions regarding this document can be brought to my attention.

Sincerely,

Jeff Ritter
