Re: Sole Source Certificate for ATMOS 41 Weather Station

To Whom It May Concern:

This is to certify that METER Group, Inc., a company based in Pullman, WA, is the sole manufacturer of the ATMOS 41 All-in-one Weather Station.

The ATMOS 41 was designed for continuous monitoring of the following environmental variables: Solar radiation, precipitation, precipitation electrical conductivity, precipitation maximum intensity, air temperature, barometric pressure, vapor pressure, relative humidity, wind speed, wind direction, maximum wind gust, lightning strikes, lightning distance, tilt. All sensors are integrated into a single, small form-factor unit, requiring minimal installation effort. The robust design with no moving parts prevents errors due to wear and makes the sensor ideal for long-term, remote installations. This sensor is compatible with ZL6 or EM60 data loggers.

The ATMOS 41 is manufactured at METER Group's facility in Pullman, Washington and sold directly to the end-user. Each instrument's output is verified at our facility before it is shipped. The product has a one-year warranty that covers all necessary maintenance or repair, an attempt at sensor maintenance outside of METER will void this warranty.

Any comments or questions regarding this document can be brought to my attention.

Sincerely,

Jeff Ritter
