Re: Sole Source Certificate for ATMOS 41W Wireless all-in-one weather station

To Whom It May Concern:

This is to certify that METER Group, Inc., a company based in Pullman, WA, is the sole manufacturer of the ATMOS 41 Wireless All-in-one weather station. The ATMOS 41W was designed for continuous monitoring of the following environmental variables: Solar radiation, precipitation, precipitation electrical conductivity, precipitation maximum intensity, air temperature, barometric pressure, vapor pressure, relative humidity, wind speed, wind direction, maximum wind gust, tilt. All sensors are integrated into a single, small form-factor unit, requiring minimal installation effort. The robust design prevents errors due to wear and makes the sensor ideal for long-term, remote installations. With the sensor being completely wireless, to access the data a data subscription for our ZENTRA Cloud must be purchased.

The ATMOS 41W is manufactured at METER Group's facility in Pullman, Washington and sold directly to the end-user. Each instrument's output is verified at our facility before it is shipped. The product has a one-year warranty that covers all necessary maintenance or repair, an attempt at sensor maintenance outside of METER will void this warranty. Our Zentra Cloud software was designed and is updated here in Pullman, WA

Any comments or questions regarding this document can be brought to my attention.

Sincerely,

Jeff Ritter
