Re: Sole Source Certificate for D1 Dendrometer

To Whom It May Concern:

This is to certify that METER Group, Inc., a company based in Pullman, WA, is the sole manufacturer of the D1 Dendrometer and compatible data loggers.

The D1 Dendrometer is a simple tool that allows you to manually measure changes in the circumference of tree stems over time. The D1 is designed to be installed, left in place, and periodically visited to record changes in the circumference resulting from tree or stem growth.

Each sensor output is verified at our facility before it is shipped. The D1 Dendrometer is manufactured at METER Group's facility in Munich, Germany and sold directly to the end-user (as well as to domestic irrigation management representatives and international distributors). The product has a one-year warranty that covers all necessary maintenance or repair, an attempt at sensor maintenance outside of METER will void this warranty.

Any comments or questions regarding this document can be brought to my attention.

Sincerely,

Shaun Weldon
