Re: Sole Source Certificate for HYDROS 11 electrical conductivity sensor

To Whom It May Concern:

This is to certify that METER Group, Inc., a company based in Pullman, WA, is the sole manufacturer of the HYDROS 11 sensor and compatible data loggers.

The HYDROS 11 sensor was designed to measure electrical conductivity and temperature in a pipe or tank. EC is useful for measuring salinity levels or quality of irrigation water. This sensor is compatible with ZENTRA ZL6 or EM50-60 data loggers, or able to be integrated with compatible third-party data loggers.

Each sensor output is verified at our facility before it is shipped. The HYDROS 11 sensor is manufactured at METER Group's facility in Pullman, Washington and sold directly to the end-user (as well as to domestic irrigation management representatives and international distributors). The product has a one-year warranty that covers all necessary maintenance or repair, an attempt at sensor maintenance outside of METER will void this warranty.

Any comments or questions regarding this document can be brought to my attention.

Sincerely,

Chris Chambers
