Re: Sole Source Certificate for PHYTOS 31 Leaf Wetness Sensor

To Whom It May Concern:

This is to certify that METER Group, Inc., a company based in Pullman, WA, is the sole manufacturer of the PHYTOS 31 sensor and compatible data loggers.

The PHYTOS 31 sensor measures both the onset and duration of wetness on a simulated leaf, which helps predict when certain diseases or infections may occur. The sensor uses capacitance technology and is sensitive enough to detect sub-milligram levels of water condensing on the surface, as well as frost and ice formation. This sensor is compatible with ZENTRA or EM50-60 data loggers, or able to be integrated with compatible third-party data loggers.

Each sensor output is verified at our facility before it is shipped. The PHYTOS 31 sensor is manufactured at METER Group's facility in Pullman, Washington and sold directly to the end-user (as well as to domestic irrigation management representatives and international distributors). The product has a one-year warranty that covers all necessary maintenance or repair, an attempt at sensor maintenance outside of METER will void this warranty.

Any comments or questions regarding this document can be brought to my attention.

Sincerely,

Jeff Ritter
