Re: Sole Source Certificate for RT-1 Sensor

To Whom It May Concern:

This is to certify that METER Group, Inc., a company based in Pullman, WA, is the sole manufacturer of the RT-1 sensor and compatible data loggers.

The RT-1 was designed for continuous monitoring of soil temperature. The RT-1 uses a stainless steel casing with a temperature thermistor contained inside. This sensor is compatible with ZENTRA or EM50-60 data loggers, or able to be integrated with compatible third-party data loggers.

Each sensor output is verified at our facility before it is shipped. The RT-1 sensor is made in the factory here in Pullman, WA and sold directly to the end-user (as well as to domestic irrigation management representatives and international distributors). The product has a one-year warranty that covers all necessary maintenance or repair, an attempt at sensor maintenance outside of METER will void this warranty.

Any comments or questions regarding this document can be brought to my attention.

Sincerely,

Chris Chambers
