Re: Sole Source Certificate for SC-1 Leaf Porometer

To Whom It May Concern:

This is to certify that METER Group, Inc., a company based in Pullman, WA, is the sole manufacturer of the SC-1 Leaf Porometer.

The SC-1 Leaf Porometer is a lightweight, portable instrument designed for rapid measurement of leaf stomatal conductance. The instrument uses a steady-state measurement method to determine vapor flux from the leaf and reports measurements as either vapor conductance or resistance. The SC-1 provides measurements in approximately 30 seconds and stores measurement data for later download.

Each sensor output is verified at our facility before it is shipped. The SC-1 sensor is manufactured at METER Group's facility in Pullman, Washington and sold directly to the end-user (as well as to domestic irrigation management representatives and international distributors). The product has a one-year warranty that covers all necessary maintenance or repair, an attempt at sensor maintenance outside of METER will void this warranty.

Any comments or questions regarding this document can be brought to my attention.

Sincerely,

Jeff Ritter
