Re: Sole Source Certificate for SOLYX 14

To Whom It May Concern:

This is to certify that METER Group, Inc., a company based in Pullman, WA, is the sole manufacturer of the SOLYX 14.

The SOLYX 14 sensor was designed for continuous monitoring of dielectric permittivity, soil moisture, temperature, and electrical conductivity (EC). When connected to a compatible data acquisition system, the SOLYX 14 measures soil moisture and EC using the Complex Dielectric through Intersections (CDX) method. Temperature is measured using a thermistor. The sensor requires 4-15 VDC and has a digital output. This sensor is compatible with ZENTRA or EM50-60 data loggers, or able to be integrated with compatible third-party data loggers.

The SOLYX 14 is manufactured at METER Group's facility in Pullman, Washington and sold directly to the end-users in the United States. The product has a three-year warranty that covers all necessary maintenance or repair against manufacturing defects.

Any comments or questions regarding this document can be brought to my attention.

Sincerely,

Leo Rivera
