Re: Sole Source Certificate for TEMPOS Thermal Analyzer

To Whom It May Concern:

This is to certify that METER Group, Inc., a company based in Pullman, WA, is the sole manufacturer of the TEMPOS readout unit and compatible TEMPOS thermal sensors.

The TEMPOS controller, when used with the appropriate sensor, measures thermal conductivity, thermal resistivity, thermal diffusivity, and volumetric specific heat. Each compatible sensor is designed for specific materials, measurement ranges, and applications. Detailed sensor specifications, selection guidance, and applicable standards are provided in the TEMPOS User Manual ([Section 2.1](#)). Readings may be collected manually or in unattended mode, with certain measurements completed in one minute. The controller resolves temperature to ± 0.001 °C.

Each sensor output is verified at our facility before it is shipped. The TEMPOS is manufactured at METER Group's facility in Pullman, Washington and sold directly to the end-user (as well as to domestic irrigation management representatives and international distributors). The product has a one-year warranty that covers all necessary maintenance or repair, an attempt at sensor maintenance outside of METER will void this warranty.

Any comments or questions regarding this document can be brought to my attention.

Sincerely,

Shaun Weldon
