Re: Sole Source Certificate for TEROS 6 Soil Profile Temperature Probe

To Whom It May Concern:

This is to certify that METER Group, Inc., a company based in Pullman, WA, is the sole manufacturer of the TEROS 06 sensor and compatible data loggers.

The TEROS 06 sensor is a precision temperature profile probe that measures soil temperature at 6 depths, following World Meteorological Organization (WMO) recommendations. The probe is designed to be installed in a pre-augured hole at a diameter of 20 mm

Each sensor output is verified at our facility before it is shipped. The TEROS 06 sensor is manufactured at METER Group's facility in Munich, Germany, and sold through the main office in Pullman, WA and sent directly to the end-user (as well as to domestic irrigation management representatives and international distributors). The product has a one-year warranty that covers all necessary maintenance or repair, an attempt at sensor maintenance outside of METER will void this warranty.

Any comments or questions regarding this document can be brought to my attention.

Sincerely,

Chris Chambers
