Re: Sole Source Certificate for TEROS 11

To Whom It May Concern:

This is to certify that METER Group, Inc., a company based in Pullman, WA, is the sole manufacturer of the TEROS 11 and compatible data loggers.

The TEROS 11 sensor was designed for continuous monitoring of volumetric water content and temperature. When connected to a compatible data acquisition system, the TEROS 11 measures soil moisture using capacitance technology, and media specific calibration equations. Temperature is measured using a thermistor. Electrical conductivity is measured using two stainless steel prongs. The sensor requires 4-15 VDC and has a digital output. This sensor is compatible with ZL6 or EM50-60 data loggers, or able to be integrated with compatible third-party data loggers.

Each sensor output is verified at our facility before it is shipped. The TEROS 11 sensor is manufactured at METER Group's facility in Pullman, Washington and sold directly to the end-user (as well as to domestic irrigation management representatives and international distributors). The product has a three-year warranty that covers all necessary maintenance or repair against manufacturing defects.

Any comments or questions regarding this document can be brought to my attention.

Sincerely,

Chris Chambers
