Re: Sole Source Certificate for TEROS 12

To Whom It May Concern:

This is to certify that METER Group, Inc., a company based in Pullman, WA, is the sole manufacturer of the TEROS 12.

The TEROS 12 sensor was designed for continuous monitoring of soil moisture, temperature, and electrical conductivity (EC). When connected to a compatible data acquisition system, the TEROS 12 measures soil moisture using capacitance technology, and media-specific calibration equations. Temperature is measured using a thermistor. Electrical conductivity is measured using two stainless steel prongs. The sensor requires 4–15 VDC and has a digital output. This sensor is compatible with ZENTRA or EM50-60 data loggers, or able to be integrated with compatible third-party data loggers.

The TEROS 12 is manufactured at METER Group's facility in Pullman, Washington and sold directly to the end-users in the United States. The product has a three-year warranty that covers all necessary maintenance or repair against manufacturing defects.

Any comments or questions regarding this document can be brought to my attention.

Sincerely,

Chris Chambers
