Re: Sole Source Certificate for TEROS 21

To Whom It May Concern:

This is to certify that METER Group, Inc., a company based in Pullman, WA, is the sole manufacturer of the TEROS 21 sensor and compatible data loggers.

The TEROS 21 was designed for continuous monitoring of water potential and temperature of soils when connected to a compatible data acquisition system. The water potential measurement range is 0 to -100,000 kPa with a temperature measurement range of -40 to 60 °C. The sensor requires 3.9-15 VDC. This sensor is compatible with our ZL6, ZENTRA Cloud, and EM50-60 data loggers, or able to be integrated with compatible third-party data loggers.

Each sensor output is verified at our facility before it is shipped. The TEROS 21 sensor is manufactured at METER Group's facility in Pullman, Washington and sold directly to the end-user (as well as to domestic irrigation management representatives and international distributors). The product has a one-year warranty that covers all necessary maintenance or repairs to prevent any factory defects.

Any comments or questions regarding this document can be brought to my attention.

Sincerely,

Leo Rivera
