Re: Sole Source Certificate for TEROS 32 Tensiometer

To Whom It May Concern:

This is to certify that METER Group, Inc., a company based in Pullman, WA, is the sole manufacturer of the TEROS 32 tensiometer and compatible data loggers.

The TEROS 32 tensiometer was designed for measuring matric water potential in the wet range. The device has a measurement range of 50 to -85 kPa. The device works as a highly precise pressure transducer and was engineered to be robust enough to survive year-long in the field. The TEROS 32 also has an external refilling tube, so it does not need to be extracted from the ground to fill. This sensor is compatible with ZENTRA or EM50-60 data loggers, or able to be integrated with compatible third-party data loggers.

Each sensor output is verified at our facility before it is shipped. The TEROS 32 Tensiometer is manufactured at METER Group's facility in Munich, Germany, although it is sold through the main office in Pullman, WA and sent directly to the end-user (as well as to domestic irrigation management representatives and international distributors). The product has a one-year warranty that covers all necessary maintenance or repair; an attempt at sensor maintenance outside of METER will void this warranty.

Any comments or questions regarding this document can be brought to my attention.

Sincerely,

Chris Chambers
