Re: Sole Source Certificate for TEROS 54

To Whom It May Concern:

This is to certify that METER Group, Inc., a company based in Pullman, WA, is the sole manufacturer of the TEROS 54 and compatible data loggers.

The TEROS 54 sensor was designed for continuous monitoring of volumetric water content and temperature at four depths of 15 cm, 30 cm, 45 cm, and 60 cm. When connected to a compatible data acquisition system, such as the METER ZL6 data logger, it TEROS 54 measures soil moisture using the capacitance method, a type of frequency domain technology, and media-specific calibration equations.

This sensor was designed to be used with a compatible installation tool and a removal tool to ensure an easy installation and removal; additionally, these tools ensure quality data collection and prevent the sensor from being damaged. Any installation or removal of TEROS 54 without using the compatible METER Group tools will void the warranty.

Each sensor output is verified at our facility before it is shipped. The TEROS 54 sensor and installation/removal tools are made in our Munich, Germany facility and sold directly to the end-user, as well as to domestic irrigation management representatives and international distributors. The product has a one-year warranty that covers all necessary maintenance or repair, any attempt at sensor maintenance outside of METER will void this warranty.

Any comments or questions regarding this document can be brought to my attention.

Sincerely,

Shaun Weldon
