Re: Sole Source Certificate for Vapor Sorption Analyzer

To Whom It May Concern:

This is to certify that METER Group Inc., a company based in Pullman, WA, is the sole distributor of the VSA analyzer for soil measurement applications. The VSA is manufactured by Addium Inc., a company based in Pullman, WA.

The VSA analyzer was designed to generate full and detailed absorption and desorption curves within 48 hours. The VSA gives you DVS capability and a DDI mode that shows you the whole picture of how your product changes during adsorption and desorption.

The VSA analyzer is made by Addium in Pullman, WA and sold and shipped by METER Group Inc. directly to the soil application end-user. Each VSA benchtop instrument's output is verified at the Addium facility before it is procured and shipped to the end-user. The product has a one-year warranty against manufacturer defects. Any needed maintenance or repair should be conducted or guided by METER Group's technical support team; any attempt at instrument repair outside of METER will void this warranty.

Any comments or questions regarding this document can be brought to my attention.

Sincerely,

**Shaun Weldon**
